

LearningHacks

Where Brain Science, Constructionism,
&  Come Together

John G. Hendron
Supervisor of Instructional Technology

Learning Hack #1:
Start a unit of study
with hands-on
experiences.

Learning Hack #2:
Create things where
there isn't one
correct solution.

Learning Hack #3:
Use technology in
scenarios where you're
working on developing
21st century skills.

Learning Hack #4:
Integrate technology to
aid in presenting less-
abstract information in
the classroom.

Learning Hack #5:
Repeat learning
experiences using a
variety of approaches
that add detail and
expand upon ideas.

Learning Hack #6:
Begin units of study
with high-impact
experiences that are
multisensory.

Learning Hack #7:
Give **focus** to students
by identifying what's
important before a new
project is introduced
via a **schema**.
